

Project Name:	Environment Pollution
Prepared By:	Chhoti Ki Toli
Date:	2 nd Nov 2022

Project Scope:

1. To study variation in pollution.

- To find highly polluted areas and less polluted area.
- To build visualizations and charts of factors affecting areas (i.e. air pollutant factors).
- To study daily, monthly, quarterly or yearly wise air pollution.
- To determine when the pollution is high/low.

2. Comparison between pollutants.

- To compare overall pollutants status (i.e. CO, CO₂, SO₂, NO₂, etc.) in a particular region.

3. To send alert messages according to pollution status.

4. To study Pre-covid and During-covid data.
